

What is Claimed

1. A batting stance training device, comprising:
a first strip of material for positioning adjacent to a home plate; and
a plurality of foot position indicators moveably attached and extending from the first strip of material, each foot position indicator having an edge against which a foot is placed during batting.
2. The batting stance training device according to Claim 1, including a fastener extending partially along the length of the first strip of material, and a fastener attached to each of the foot position indicators to allow moveable attaching of the foot position indicators to the first strip.
3. The batting stance training device according to Claim 1, including an opening in each end of the first strip to allow a it to be anchored in position by a pin device.
4. The batting stance training device according to Claim 1, including second, third, and fourth strips, attached to each other and said first strip to form a batting box in which the batters stands adjacent to the foot position indicators.

5. The batting stance training device according to Claim 1, wherein said first strip is of a flexible material that may be folded or rolled into a small size to facilitate carrying and storage.

6. The batting stance training device according to Claim 4, wherein said second, third, and fourth strips are of a flexible material that may be folded or rolled into a small size to facilitate carrying and storage.

7. The batting stance training device according to Claim 1, wherein said foot positioning indicators include a generic outline of a foot.

8. The batting stance training device according to Claim 1, wherein said plurality of foot position indicators are slidably mounted on said first strip.

9. The batting stance training device according to Claim 1, including indicia thereon for indicating the position of each foot position indicators on said first strip.

10. The batting stance training device according to Claim 9, wherein said foot position indicators have an open therein through which the indicia on the first strip may be viewed to indicate the

position of the foot position indicator location on the first strip.

11. A batting stance training device, comprising:

a first strip of material for positioning adjacent to a home plate;

a plurality of foot position indicators moveably attached and extending from the first strip of material, each foot position indicator having an edge against which a foot is placed during batting; and

a plurality of additional strips of material for attaching to said first strip and to each other for forming a batter box around the foot position indicators.

12. The batting stance training device according to Claim 11, including a fastener extending partially along the length of the first strip of material, and a fastener attached to each of the foot position indicators to allow moveable attaching of the foot position indicators to the first strip.

13. The batting stance training device according to Claim 11, including an opening in each end of the first strip to allow a it to be anchored in position by a pin device.

14 The batting stance training device according to Claim 11 wherein said first strip is of a flexible material that may be folded or rolled into a small size to facilitate carrying and storage.

15 The batting stance training device according to Claim 11 wherein said additional strips of a material are of a flexible material that may be folded or rolled into a small size to facilitate carrying and storage.

16. The batting stance training device according to Claim 11, wherein said foot positioning indicators include a generic outline of a foot.

17. The batting stance training device according to Claim 11, wherein said plurality of foot position indicators are slidably mounted on said first strip.

18. The batting stance training device according to Claim 11, including indicia thereon for indicating the position of each foot position indicators on said first strip.

19. The batting stance training device according to Claim 18, wherein said foot position indicators have an open therein through which the indicia on the first strip may be viewed to indicate the

position of the foot position indicator location on the first strip.

20. A batting stance training device, comprising:

a first strip of material for positioning adjacent to a home plate, said first strip having a position indicia thereon; and

a plurality of foot position indicators slidably and moveably attached and extending from the first strip of material, each foot position indicator having an edge against which a foot is placed during batting.
